Dear Parent/Guardian

### Science – Christmas Homework for Year 11

I am very pleased with current progress in Science from Year 11. Recognising this progress during a difficult time is important and I congratulate all of Year 11 on their hard work. However, building this progress is important and I do not want to lose the momentum Year 11 have built up in recent months.

This year in Science we have a motto “Practice to perfect” and with that in mind, students are being given Christmas homework to complete and bring back to school in January. Given that students are either studying for 2 or 3 GCSEs in Science, the amount of homework reflects this. I recommend students spend a full hour of work (60 minutes) on each subject, so if they are studying for 3 GCSEs in Biology, Chemistry and Physics they have been given 3 hours of work to do. Students can use their knowledge organisers to help them with this homework. I will also be checking my email intermittently through the holiday period so that I can respond to any questions your son/daughter may have.

If your son/daughter has been shielding or isolating at home, the homework pack has been mailed to the address that the school holds for you.

The deadline for this homework is 8 January 2021. Failure to complete the homework will result in normal behaviour procedures being followed and detentions being issues.

If you have any further questions please do email [k.hardman@maidenerleghtrust.org](mailto:k.hardman@maidenerleghtrust.org)

Yours faithfully

K Hardman  
Head of Science
