Dear Parent/Guardian

RE: Year 8 Cyber Forensics Days

We are delighted to inform you that on Wednesday 2 March our Year 8 cohort will be participating in an educational enrichment activity hosted by The Small Piece Trust. For 50 years The Smallpeice Trust has been giving young people everything they need to fuel their passion for Science, Technology, Engineering and Maths.

Year 8's will focus on Cyber Forensics. The full day workshop is perfectly designed to teach the students that if they've ever sent a message on WhatsApp or completed a Captcha form online, then they've benefited from cyber security. The day will explore the risks that threaten our freedom in cyberspace and looks at the latest security measures protecting the world from hackers, scammers and criminals.

By learning about secure coding and cyber security technologies from experts, students will build a solid understanding of cyber security and be given the resources they need to follow their passion for STEM subjects. The course is generously supported by Thales, the global technology business that operates across aerospace, defence, digital security, transport and space.

We hope that the day will be inspiring and motivating for our students. Maiden Erleigh Chiltern Edge strongly believes that by giving our students every opportunity to build and develop useful skills, during this year and beyond, will help them face any challenge that comes their way with care, confidence and resilience.

We thank you for your support in advance.

Yours faithfully

Mrs J Chopra

Head of Maths/ Associate SLT
