

# DESIGN TECH: Autumn 2024

Zackary A

Elsie D

This past term we have been busy in Design and Technology. In KS3: Year 7's have been ensuring they know all about the Health & Safety procedures in the workshop while also making wonderful photo stands. Year 8 have been creating bespoke metalwork pewter castings and Year 9 have been improving their electronics and making skills by producing freestanding desk lamps. In KS4: Year 10 have been working on speaker units as their main practical whilst also navigating their way through the new D+T GCSE content and theory. Year 11 have been getting stuck into their portfolio and prototypes for their GCSE coursework in addition to studying for their recent PPE papers. Well done to all those working hard in Design Tech and I look forward to the new year.

Year 7

Year 8

Year 9

### ART : Autumn 2024

**Year 7's**, Looked at the work of Charles McGee and Matisse's paper collages.

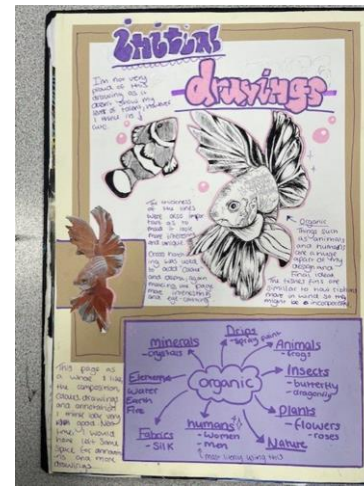

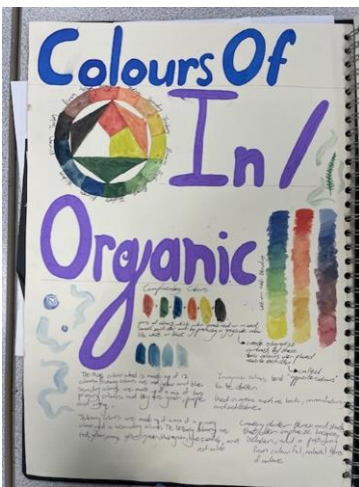

**Year 8's**, Looked at the work of max Ernst exploring frottage and collage.

**Year 9's**, created Hannah Hoch inspired photomontages.

**Years 10 and 11** have been working on their course work over the last few months to focus on their final pieces of work.

Year 10 & 11

The KS3 students have been making lots of delicious foods over the last few months as you can see in these photos. ←

The KS4 have been working on their high skills with the recipes they have been making in preparation of their GCSE's some amazing work! →
