Dear Parent/Guardian

MathsWatch

The Mathematics Department at Maiden Erlegh Chiltern Edge, have been reviewing our online support packages for Mathematics and are proud to introduce MathsWatch as another online resource for students to use as part of their homework and revision.

MathsWatch will be the primary resource that teachers use for revision and setting homework. With the new changes to the curriculum at GCSE and the recent refinement of the Key Stage 3/4 schemes of work, it is important to have an online resource that enables us to easily monitor student progress and provide students with an accessible platform to gain support outside of the classroom.

MathsWatch provides a bank of video clips for every topic across the curriculum as well as an excellent bank of exam style questions which can be tailored directly to each individual student or teaching group.

As a resource to help support the learning in the classroom, it provides an excellent tool for student self – reflection and aids the development of independent study skills which are both vital for success in a more challenging GCSE.

Each individual student will be given their username and password by their teacher or tutor.

To help with understanding how to use the MathsWatch package a parent/student guide has been published on our website. I hope it is useful and will enable you to support your child with their mathematics at home.

If you have any further questions or queries then please do not hesitate to email me on ichopra@maidenerleghchilternedge.co.uk

Yours faithfully

Mrs J Chopra
Head of Mathematics
